

The new Delta II introduces the latest updates and improvements to the remarkably successful Delta system. For even more flexibility bracket holders are now located inside the frame providing easy attachment of arms at any point.

Backs, bases and legs now push in to special polymer inserts and tables have a new bracket support system for easier assembly and improved rigidity. Delta II is delivered flat in boxes for home assembly. No tools are required and the base has a special zip pocket that can be used to store bed brackets and other accessories after assembly. A new Delta joining system holds the units securely together.

Box arms can be added instead of tables. Bed brackets are available to change the Delta II into a bed or change the back cushion into a footrest. Delta II is built around the famous King Furniture steel frame and is available in your choice of quality fabrics and leathers.
